

# Quality Policy

We pay attention to our Customers' needs in order to understand their requirements, and we always treat them with professionalism, fairness and respect.

We provide services, which conform to the applicable, international and national regulations that safeguard the safety of life at sea, the property and the environmental protection.

We also provide services, which conform to the requirements of our Customers, provided always requirements are in accordance of the applicable maritime regulatory systems.

We deliver our services on time and with no defects, with straightforward procedures and without any hidden costs.

We always remain on edge and up to date with developments of regulatory issues, the upgrade of our technical expertise.

When the Customer's requirements have been clearly established Company ensures that work is completed correctly and according to Company policy and procedures, the applicable maritime regulatory systems as well as customer requirements.

We have implemented and maintain a Quality Management System which complies with the requirements of ISO 9001:2015 and continuously monitored, improved and reviewed in respect to our needs, national and international regulations and ensure Customers' suitability. The Quality Manager is in charge with the duty of managing the quality system which enables the Company to provide a standard of excellence to our Customers by producing the evidence that this has occurred and goes on continuously.

Our documented Quality Management System is in the process to be certified by an independent accredited organization.

By signing this Quality Policy, the Director gives his approval to the Quality Management System described and in supporting Company processes.
