

IHM Preparation and Certification Process

Following steps briefly describes our Inventory of Hazardous Materials (IHM) preparation with verification and certification by RO.

The HKC and EU SRR requires proper maintenance and update of the IHM throughout the operational life of ship for which the Regulation applies. This means that if any new or different machinery or equipment is added to, removed or replaced, the IHM must be updated by collection of suppliers' declarations.

For the newly installed equipment, the IHM Part I needs to be updated by obtaining Material Declaration (MD) and Supplier's Declaration of Conformity (SDoC) from the suppliers. The Shipowner's Designated Person is responsible for maintaining the IHM Part I document which is subject to routine checks and controls by authorities, PSC Officer and Class surveyors.
